## **You plant Nur- sery Stock as an Investment**

---

---

Pay a fair price for it and secure the best. Select your Nursery the same as you select your banker, lawyer, doctor, or merchant.

The planter buying cheap trees never fools anyone but himself.

## **WHAT WE CLAIM FOR ILGENFRITZ TREES**

Agricultural Colleges have repeatedly stated that it is impossible to pedigree fruit trees such as Apples, Pears, Peaches, Plums, Apricots, Nectarines, and Quinces, when they are propagated by Nursery methods. The tops of these trees are *always* taken from trees of notably heavy bearing habit but *no official experiments have yet proven that this has the slightest effect on the young tree.* The roots of the above mentioned trees are all from wild seedlings. It is known that these wild seedling roots have some small effect on the future tree but no one as yet has discovered how to select seedlings which will improve the strain.

## **HOW CAN WE PRODUCE BETTER TREES?**

We use the best ground obtainable for producing young trees. We use great care in budding and grafting so that all unions are as perfect as possible. We trim these trees intelligently so they will have good structure when they come to bear. Before digging they are properly matured and not stored until thoroughly ripe. We deliver trees produced only under the best conditions obtainable. When they reach you they are not soft, sappy, and depleted—they are vigorous, thrifty, and full of life.

## **WE MAKE NO EXTRAVAGANT CLAIMS**

We merely put the facts before you so you can judge for yourself.

## **GIVE THE CORRECT VARIETIES      SIZES      PRICES IN YOUR ORDER**

**DO NOT SPECIFY EXACT SIZES. AN ORDER  
FOR AN 18-INCH SHRUB OR 10-FOOT TREE WILL  
NOT BE ACCEPTED. MAKE YOUR SIZES READ  
18 TO 24 INCHES; 8 TO 10 FEET.**

## **THIS PRICE LIST CANCELS ALL PREVIOUS PRICES**

## **DO YOU BUY YOUR FRUIT TREES BY HEIGHT OR CALIPER?**

Either measurement alone is inaccurate. You must have both. Trees sold by caliper only may be very short and trees sold by height alone may be so spindly as to be practically useless. We grade by both minimum height and diameter. Our trees are always calipered 2 inches above the collar or bud. You get full measure when buying Ilgenfritz Trees.

### **OUR OBLIGATION**

Every customer is entitled to receive in good condition, sound, healthy trees or plants of the size, age and variety for which he pays.

The successful growth of trees and plants after delivered to customers in good condition, depends almost entirely on conditions of soil, weather and after-care, all of which are beyond our control. If any stock fails to grow, we help share the loss with our customers by replacing at one-half of the original purchase price.

We pay packing and shipping charges on all orders excepting those of less than Ten Dollars that are shipped direct to customer.

**SELL 5 TREES AT 10 RATE AND 50 AT 100 RATE**

**FRUIT TREES****STANDARD APPLES**

Apple orchards are an investment. Five to ten years after planting they pay big profits. A very few trees planted in a back yard will often yield surprising returns.

**CORTLAND OR IMPROVED McINTOSH**

Another year has passed since the Cortland was introduced. The reports from owners of this excellent apple show that it will become a very important commercial variety. Unlike the McIntosh, the fruit, when ripe, hangs on the tree splendidly. It matures two to four weeks earlier than McIntosh and will keep a month longer. It also stands the wear and tear of marketing better. In other ways it is like its forerunner, itself an excellent apple much used in commercial orchards. We have a few more Cortland trees this year than last.

Sold only as one tenth of an order of other nursery stock.

Cortland, Select Trees-----\$2.00 Each

**CRAB APPLES****ACCURATE GRADE**

Diameter	Height	Each	Per Ten
11/16 to 1 inch-----	5 ft. and up----	\$1.75	\$16.00
9/16 to 11/16 inch-----	4 ft. and up----	1.50	14.00

**Hyslop**Red, late, excellent  
for jelly.**Whitney**

Large, extra good

**Martha**

Bears young, good for eating or cooking.

We cannot supply the Transcendent. It grows very well in the nursery row but blights so badly in the orchard that it does not pay to plant.

**STANDARD PEARS**

Require little care and make big returns. Good trees for the home orchard. The fruit sweet and full of flavor is unequaled for jellies, desserts, canning, and cider.

**ACCURATE GRADE**

Diameter	Height	Each	Per Ten

**DWARF FRUITS**

In the garden or small yard where standard trees take too much space, dwarfs should be planted. They require the same care as standard trees but bear young, and have low, broad heads. Fruit is easily picked. They can be planted 10 to 12 feet apart.

**We grow only the varieties listed below in dwarf trees.  
Do not order other varieties.**

## ROSES

Roses are essential in any garden. Whether there be a single plant covering a wall or a well planned plot of bushes the effect is one of color and beauty not to be obtained by any other type of plant.

The Roses listed below are large first quality 2 year field grown bushes not to be confused with the cheaper grades sold in stores or by mail order houses.

We have put a few of the most popular hardy roses in black-faced type for ready reference.

Aus—Austrian	Moss—Moss
Beng—Bengal	Mult—Multiflora
Cl—Climbing	Nois—Noisette

**EVERGREENS****CONIFEROUS EVERGREENS**

No efforts have been spared to make these evergreens the best that can be produced. They are grown in specially wide rows, root-pruned, and transplanted sufficiently to insure a good root system, and carefully trimmed to produce full even shapes and proper bushiness.

Trees listed below are individually selected from our stock and are well worth the price we ask for them.

**Stock is balled and burlaped.**

**Evergreens not guaranteed.**

## PERENNIALS

The Permanent flower. The plant dies down each year only to return again the next year with renewed vigor and increased size. These plants have flowers of almost every known color and shape. Plant them by the dozens and reap a huge benefit each year, of color and fragrance.

## PLANTING TABLES

Recommended Distances for Planting Various  
Trees and Plants

Apples	25 to 50 ft. apart
Pears, Std.	16 to 20 ft. "
Pears, Dwarf	12 to 16 ft. "
Cherries	18 to 20 ft. "
Plums	16 to 20 ft. "
Peaches	16 to 20 ft. "
Quinces	12 to 16 ft. "
Apricots	16 to 20 ft. "
Grapes	10 by 10 ft. "
Gooseberries	4 to 6 ft. "
Currants	4 to 6 ft. "
Raspberries, Red	3 to 4 ft. "
Raspberries, Black	4 to 5 ft. "
Blackberries	5 to 7 ft. "
Strawberries in rows	1 by 3 ft. "
Strawberries in beds	1½ by 1½ ft. "
Asparagus in beds)	1 by 1½ ft. "
Asparagus in field	1 by 3 ft. "

Number of Trees or Plants per Acre at Various  
Planting Distances

2 ft. by 2 ft.	10,890
3 ft. by 3 ft.	4,840
4 ft. by 4 ft.	2,723
5 ft. by 5 ft.	1,742
6 ft. by 6 ft.	1,210
8 ft. by 8 ft.	680
10 ft. by 10 ft.	435
10 ft. by 12 ft.	363
10 ft. by 20 ft.	217
12 ft. by 12 ft.	302
12 ft. by 15 ft.	242
15 ft. by 15 ft.	194
16½ ft. by 16½ ft.	160
18 ft. by 18 ft.	135
20 ft. by 20 ft.	109
24 ft. by 24 ft.	75
25 ft. by 25 ft.	70
28 ft. by 28 ft.	55
30 ft. by 30 ft.	48
33 ft. by 33 ft.	40
35 ft. by 35 ft.	35
40 ft. by 40 ft.	27
50 ft. by 50 ft.	18

Rule: Multiply the distance in feet between the rows by the distance the plants are apart in the rows and the product will be the number of square feet for each plant or hill; which divided into the number of feet in an acre (43560) will give the number of trees to an acre.
